Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

4. Claims 1-13, 16-28, 31-41, 44-51, 56-58 & 64-66 are rejected under 35 U.S.C. 102(e) as being anticipated by Hornik et al. (US Patent Publication 2004/0152509).

Art Unit: 3714

Claims 1, 17, 32, 45, 56 & 64: Hornik et al. discloses of a game play via a gaming apparatus, wherein the gaming apparatus comprises of a value input device to receive a value input from the player (figure 1, element 22), and causing the first display unit to display a first game (figure 1, element 12, wherein the displayed game is a slot game). Hornik et al. also discloses of selecting one of plurality of player input displays (figure 4, elements 54, 56, 58, 60, 62, 64, 68, 70, 72 and also element 28), and the second display to display the selected player inputs (figure 1, element 28 being the second display), wherein the player input data is received through touch screen (0021). Hornik et al. also determines the outcome of the game and awards the player accordingly (0024).

Claims 2-3, 18-19, 33 & 46-47: Hornik et al. discloses that the second display unit displays at least one button (figure 4 and 0025, 0036 teach of buttons, which needs to be "depressed" or selected by the player).

Claims 4-9, 20-23, 34-37 & 48-49: Hornik et al. discloses of causing the second display unit to display a background (0025-0026, 0035, wherein the background could be an image, a graphic or a video).

Claims 10, 24, 38, 57 & 65: Hornik et al. discloses the second display unit to display second game display (0026 and figure 4, 0032-0036, wherein the selected one of the plurality of player input displays comprises the second game display).

Claims 11-12, 26-27 & 39-40: Hornik et al. discloses the first display unit to display a bonus game, or an event, while causing the second display unit to display the second game display (0035).

Art Unit: 3714

Claims 13 & 28: Hornik et al. discloses of selecting the one of the plurality of player input displays based on player input (figures 1 and 4 and their description thereof).

Claims 16, 31, 41, 44, 50-51, 58 & 66: Hornik et al. discloses of receiving player input data via one button separate from the second display unit (figure 1, element 20).

Claim Rejections - 35 USC § 103

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

6. Claims 14-15, 29-30, 42-43 are rejected under 35 U.S.C. 103(a) as being unpatentable over Hornik et al. as applied to claim 1-13, 16 above, and further in view of Rothschild et al. (US Patent Publication 2005/0054438).

Claims 14-15, 29-30 & 42-43: Hornik et al. teaches the invention substantially as claimed, however fails to teach of display unit for displaying a user interface for player tracking information or an interface for ordering a drink, a food item, a ticket to a show, or any other services provided by the casino.

Rothschild et al. teaches of displaying player tracking information as well as information related to player ordering drinks, food, ticket to a show etc (figure 1). It would have been obvious to one with ordinary skill in the art at the time of the invention

Art Unit: 3714

to have implemented player tracking and ability to order drinks, thus providing an excellent service to the player and thus increasing player loyalty because the player is encouraged to frequently visit the casino to earn more points on the players card (0005).

7. Claims 52-55, 59-63, 67 & 68 are rejected under 35 U.S.C. 103(a) as being unpatentable over Hornik et al. (as applied to the claims above) and further in view of Randall et al. (US Patent 6,318,721).

Hornik et al. teaches the invention substantially as claimed, including buttons on the gaming machine for player inputs (figure 1, element 20). However Hornik does not teach of placing plurality of lights beneath the buttons to cause button on the panel corresponding to the selected one to be illuminated and de-illuminate the unselected buttons. Randall et al. teaches of implementing lights beneath the buttons to cause button on the panel corresponding to the selected one to be illuminated and de-illuminate (abstract and col. 2: 24-29). It would have been obvious to one with ordinary skill in the art at the time of the invention to modify Hornik et al. to include lights beneath the buttons to cause button on the panel corresponding to the selected one to be illuminated and de-illuminate, as taught by Randall et al., thus indicating to the player their selection, so that the player has an opportunity to make any changes if desired.
